

A black Angus bull on the left and a red Angus bull on the right, both facing each other in a grassy field. The background is a blurred green field with trees.

**23rd Annual
Angus Bull Sale**

**Hamco
Cattle Co**

**Saturday, March 20, 2021
At the Farm
Glenboro, MB**

HAMCO CATTLE CO.

We would like to welcome everyone to our 23rd Annual Bull Sale. We are very appreciative for the great customer support we have received over the past 23 years. Needless to say the past 12 months have changed the way we live but thankfully farmers daily life has not changed that much. Food production is essential and Canadian farmers maintained production.

At Hamco we had a good year. Pastures and crops were good until the drier fall season. Larissa and Kyle had their second child—Nyla Coreen Curtis on April 2, a sister for Nova. David & Shelley's daughter Julie married Jeremy Hildebrand in September.

We are very proud of our bull offering this year. Since we retain a large percentage of our females every year, we cull our herd aggressively and our cow herd just keeps getting stronger. We have a lot of bulls to select from (~270) so the bulls selling are from the top 40% of the group. The two year olds were developed the same as the yearlings and mainly bulls that were too young to sell as yearlings or too young to pass their semen test.

The selection of a herd bull is a very important decision for your farm as your herd bull contributes 50% of your calf's genetics. For the most part, herd improvement comes from the bulls and it has been estimated that over 80% of herd improvement is directly attributed to bull selection. We feel we can provide the genetics to take your herd in the direction you need to go. We have a good selection of bulls suitable for heifers ***, bulls that would work on well grown out heifers or cows ** and some we recommend only using on cows *

Nyla Coreen

Kyle, Larissa, Nova, Glen, Carleen, Rhett, Jennalee, Jake

As breeders we believe we should provide as much information as possible so you can make an informed buying decision. We provide you with as much current information as possible in the catalogue. The bulls were on 89 day home test (Nov 6 to Feb 3) and the information in this catalogue is current to Feb 3, 2021. Scrotal measurements were also done Feb 3 and at this age yearling bulls will add approximately 1.5 cm per month so the scrotals will be at least 2 cm larger or more by sale day. Two year old bulls were also weighed and scrotal measured on Feb 3, 2021. Most of the yearling bulls will be about 140 lbs heavier by sale day. Updated scrotals will be available on sale day.

All bulls in the sale will have a satisfactory breeding soundness evaluation prior to the sale and are fully insurable on sale day. Some bulls catalogued will be out of the sale due to not passing the breeding soundness examination by sale day.

We would like to thank Stewart Bertram, Brendan Williamson & Jeremy Hodgins for their hard work and dedication on the farm. We would also like to thank our families and friends for their support and hard work to put on the bull sale.

We are very fortunate to be involved with the Angus breed. An Angus bull is the king of crossbreeding and will provide performance and desirable carcass traits to your herd while maintaining calving ease, high conversion rates, maternal strength, easy fleshing ability and the Angus vigor at birth. The resulting hybrid vigor is still one of the best deals in the cattle industry. Remember all Angus bulls are homozygous polled.

Our program's main target is to produce Angus bulls for the commercial producer and we are honored that our bulls have entered many top commercial programs. Managing a larger herd forces us to think like a commercial producer. We believe we have a number of bulls in this sale that would offer some excellent genetics to purebred herds as well.

Please call us if you have any questions about our bulls or our program. Due to the health restrictions limiting attendees at our sale this year, we will have a video sale this year. The bulls will be penned outside the sale facility & can be viewed prior to and during the sale. The bulls will also be in their pens at the bull yard the days prior to the sale. Videos of all the bulls will be available to view online about 2 weeks prior to the sale.

Again this year we will have online bidding through DLMS for anyone that is unable to attend the sale. We still have our Sight Unseen Program available and you can bid on the phone if you prefer.

Thank you for the interest in our program and please contact us if you have any questions.

Kaitlyn, Derek, Jeremy, Julie, Shelley, David

The Hamiltons

Saturday March 20, 2021

1:00 pm at Hamco Cattle Co. Glenboro MB

Viewing of the Bulls can take place anytime prior to the sale or **10:00 am sale day** as bulls will be penned outside the sale facility

VIDEO SALE

No Bulls will physically enter the heated sale facility. A video of each bull will be playing at the time he is sold.

Sale Day Health & Safety Guidelines

Hamco Cattle Co will be doing our best to consider the health & safety of all our customers & their families. We appreciate that farming is an essential service & customers have cattle that need to be bred.

- For the safety of everyone in attendance, we ask that you follow all standard public health guidelines-physical distancing, wear a mask indoors, & enhanced sanitation.

- If possible please limit one representative from each farm.

- To spread out sale traffic, please try to view the sale cattle prior to the sale. The bulls can be viewed in their pen anytime prior to the sale, & will be housed in pens outdoors near the sale facility to view prior to the sale. If possible please call ahead & we will have someone available to show you the bulls.

- Due to regulations we will not be able to offer our usual sale day meal.

- Please do not attend the sale if you feel unwell. We will be following the Covid 19 regulations in Manitoba. If the guidelines change we will announce changes to our protocols on our website.

Offering 168 Lots

54 Red Angus Yearling Bulls
24 Red Angus 2 year old Bulls
61 Black Angus Yearling Bulls
29 Black Angus 2 year old Bulls

Auctioneer:

How To Read This Catalogue

Calving Ease Code

This is our best estimate based on EPD's, actual birth wt & body shape. Take into consideration your own cow herd genetics, environment & feeding.

* Use on Cows

** Use on Cows & well grown out heifers

*** Very few calving problems when bred to first calf heifers

Frame Score

Is a height measurement at a point directly over the hook bones of the pelvis. That measurement is then put into a formula that adjusts for the age of the bull. Frame score is a convenient way of describing the skeletal size of cattle. Most animals should maintain the same frame score throughout their life while actual height increases with age. No one frame size for an animal will be best for all feed resources, breeding systems & market specifications

EPDs

Calving Ease Direct EPD: Predicts the percentage of unassisted birthings expected from an animal's calves. This EPD reflects a combination of gestational growth and a calf's conformation. The higher the CED EPD, the more likely it is that the animal's calves will be born without assistance.

Birth Weight EPD: Expressed in lbs, predicts on average how much heavier or lighter than the breed average an animal's calves will be at birth.

Weaning Weight EPD: Expressed in lbs, predicts comparative progeny weight at 205 days of age; reflects pre-weaning growth potential that an animal is expected to contribute to its calves.

Yearling Weight EPD: Expressed in lbs, predicts the differences in progeny performance at 365 days; reflects the animals calves' potential for post-weaning growth.

Milk EPD: Expressed in lbs of calf weaned, this is a prediction of an animal's daughter's milking ability.

CANADIAN ANGUS ONE GENETIC EVALUATION

Please note that the EPDs listed in this sale catalogue are the product of the new Canadian AngusONE Genetic Evaluation. These EPDs are calculated by Angus Genetics Inc in partnership with the American Angus Association. Therefore, EPDs for Canadian Red Angus, Canadian Black Angus, and American Black Angus animals are directly comparable to each other. This is a completely new base for Canadian Red Angus however, so please be advised that the EPDs are not comparable to 2018 or earlier EPD's for Red Angus. These EPDs are on a completely different scale, so please familiarize yourself with the new Breed Average and with the new threshold number for traits of importance to you. The new AngusONE breed averages are shown below to help you adjust to the new base. Percentile rank graphs for each animal are easy to use and available at www.cdnangus.ca. The right EPD for you will depend on your cow herd, your management, and your breeding goals.

Combined American & Canadian EPD's	CED	BW	WW	YW	Milk
Average EPDs of all Black Angus calves born in 2020	+3.5	+2.1	+48	+86	+22
Average EPDs of all Red Angus calves born in 2020	+2.6	+1.1	+36	+62	+23

Management of Hamco Bulls

The yearling bulls were all born in late Jan, Feb, March of 2020 and were weaned on Oct 5, 6 & 7, 2020. They did not receive any creep feed prior to weaning. The bulls were then developed on a carefully balanced total mixed ration (TMR). On a dry matter basis they were fed 50% alfalfa grass hay, 50% corn silage & the grain (oats, corn & supplement) was gradually increased over the first 2 months. By Dec 25, 2020, the bulls reached their final ration (dry matter basis) consisting of 30% alfalfa hay & straw, 30% corn silage, 40% grain mix (corn, oats, peas, corn distillers, & supplement). The bulls should never have had more than 12.5 lbs of grain/protein mix per head per day. The TMR ration gives us complete control of the ration and insures that every bull receives the exact same feed. Bulls developed on a high forage TMR ration should never develop acidosis and laminitis, and should be healthy and be able to perform for years. The bulls are developed in a 4 acre pen & get a lot of exercise and should be athletic and ready to breed. We will continue to develop the bulls after the sale. The two year old bulls were similarly managed as yearlings and then maintained on a high forage ration. They were fed a high forage TMR with plenty of exercise in a 20 acre pen. They are not over conditioned and should breed well.

Health Status

This is a healthy group of bulls. They have all received 3 doses of MLV (IBR, BVD I & II, PI3, BRSV, Haemophilus) and 3 doses of 8-way blackleg vaccine. They have been treated with Ivermectin pour on and Clean Up twice. They have received 2 injections of Fusoguard - a foot rot vaccine that is usually effective in preventing foot rot - a condition you would certainly like to avoid in a breeding bull.

Birth—Inforce 3 (Intranasal IBR, PI3, BRSV)

Pre Breeding (April) -(Calves) - MLV IBR/BVD I & II, PI3, BRSV, Pasteurella, & 8-way Blackleg

Pre Breeding— (Cows) - MLV IBR/BVD I & II, PI3, BRSV, Lepto, Cows (late fall) - Scour Vaccine & 8-way Blackleg

Mid July (preg check) -(Calves) Deworming on pasture (Longrange), 8-way Blackleg, IBR, BVD I & II, PI3, BRSV, Haemophilus

Weaning (October)-Ivermectin pour on & 8-way Blackleg & Fusoguard (Foot Rot Vaccine- Bulls)

November 6, 2020 - Fusoguard & IBR, BVD I & II, PI3, BRSV, Haemophilus, test start weights, Clean Up Pour On

February 3, 2021 - Weigh yearlings, scrotal measurements, frame score measurements, Clean Up pour on

February 3, 2021 - Weigh 2 yr olds, scrotal measurements, Clean Up pour on

March 9 & 10, 2021 - Semen test yearlings & 2 year olds (Fusoguard, IBR/BVD I & II, PI3, BRSV, Haemophilus, 8-way Blackleg)

Our whole herd is on a strategic vaccination and parasite control program to insure our bulls stay healthy. However we know BVD is a potentially hidden yet devastating disease, & bulls can be carriers of the BVD virus (both from acute infection & as persistently infected (PI) carriers). Our vaccination program insures that BVD should not be a problem in our bulls. *You can be assured that when you purchase a bull from us that the bull is PI negative and is not a carrier of the BVD virus and he is adequately vaccinated against BVD.* We manage the feeding of the bulls very carefully. With our high forage TMR ration we were able to start the bulls on feed gradually & experienced no digestive upsets. On a 89 day test, the 220 bulls had an ADG of 3.37 and WDA of 3.11. We will continue to develop the bulls after the sale & insure a smooth transition from our ration to the grass based ration they will receive during the breeding season. All potential carriers of genetic defects have been tested, and as far as we are aware there should be no carriers of known genetic defects in the bulls.

Sight Unseen Program

Due to Covid-19 Health restrictions we realize you may not be able to attend our sale in person. You have several options.

- 1) DLMS on line bidding—be sure to register prior to the sale
- 2) On the phone live bidding. Please be sure to call prior to the sale so we can have someone on the phone with you.
- 3) Sight Unseen Program—Those who are interested in this plan are urged to call Larissa or David with your specifications & discuss the offering & will gladly assist you with sale selections & have someone represent you on sale day. Every effort will be made to buy you the right bull or bulls, at the right price to make you a happy, repeat customer. If for any reason you are not satisfied with any of the bulls you purchased on order, you are under no obligations to accept them.
- 4) Contact any of our sales staff to discuss & order on your behalf.

Semen Rights

Hamco would like to retain the right to possibly collect semen from a few bulls in the sale. At the owners convenience and at our cost we reserve the right to collect semen from any bull in the sale for in herd use only. We can also collect and freeze semen for the new owner if they wish. This can usually be done prior to delivery.

Free Board Till April 15, 2021

We will keep your bull up to April 15, 2021 at no additional charge.

Bulls are managed at the new owner's risk. We recommend you insure your bull if you leave him with us. Insurance will be available sale day. After April 15, 2021 we can continue to board your bull for \$3.50 day.

Volume Discounts on Bull Purchases

Take advantage of our Volume Discounts on bulls purchased through this sale.

2 bulls -2%	5 bulls-5%	8 bulls-8%
3 bulls -3%	6 bulls-6%	9 bulls-9%
4 bulls -4%	7 bulls-7%	10 bulls-10%

Hamco Bull Warranty

We guarantee to sell you a bull that is structurally sound, & has passed a breeding soundness evaluation. Should the bull fail to be a satisfactory breeder—unable to physically breed a cow or heifer, he will be replaced with a bull of equal value or credit given towards the purchase of another Hamco bull. In the event that your bull is a non-satisfactory breeder, we, the seller, will not, under any circumstances, be responsible for more than the original selling price of the bull in the sale. We will make sure you have a bull to get your cows bred. We however, will not provide replacement or adjustment for physical injury or mismanagement. We do not guarantee that semen collected from these bulls will freeze.

To further protect your investment beyond our warrant program Hamco is introducing the

Hamco Cattle Co. Bull Insurance Program

- Covers death, accident, sickness & disease along with the bull being unable to settle cows. Also covers infertility due to frozen testicles, loss of one testicle & testicular degeneration.

- If a bull is injured & unable to breed, dies or has to be shipped, Hamco will replace the bull with a bull of equal value or a sale credit will awarded for the next year's sale & a loaner bull will be provided to finish the breeding season.

-Should an issue arise with your bull please notify Hamco by phone or email. You will need to contact a licensed Veterinarian to diagnose & treat the animal & fill out a Veterinary report. If the animal dies, a post mortem will be required.

- This plan covers 100% of the purchase price less the salvage value when applicable.

- The cost is 7% of the sale price and is due at time of sale. *The insurance is valid for 1 year. This is more than 50% cheaper than commercial insurance & you deal directly with Hamco to quickly solve your problem.*

Or purchase from Canadian Farm Insurance (Lois McRae)

Reasons to Buy a Hamco Bull!!!

- 1) Bulls are selected from a group of 270 bulls & only the good bulls make the cut and sell.
- 2) Our herd is on the Canadian Angus Association performance program. Complete performance data is available & published—birth wt, weaning wt, yearling wt, ADG, WDA, frame score, scrotal circumference, EPD's, calving ease,
- 3) All bulls sold have passed a semen test & a Breeding Soundness examination. The bull you buy will be scored satisfactory and is fully insurable at sale time.
- 4) Bulls are developed on a high forage TMR ration for optimal development.
- 5) Bulls are quite tame, and they have lots of exposure to people as they are walked through daily.
- 6) We will manage your bulls and keep developing them free of charge until April 15, 2021 and for \$3.50 day after April 15, so that you don't have to worry about your bull until you need him to breed.
- 7) We will deliver your bull to your farm or haul your own bull sale day and receive \$100.00 off each bull purchased.
- 8) Our herd & the bulls are on a strategic vaccination program .
- 9) Large Genetic base—we use top AI sires, elite embryo donors, and strong herd bulls. We offer a diverse package of genetics and if you have bought bulls from us before, there are numerous unrelated bulls in the sale.
- 10) Breeder's Guarantee—In short, we will get your heifers or cows bred with a Red or Black Angus from Hamco. We always have spare bulls available in case a problem should arise.
- 11) Deferred payment program—50% sale day, 50% Dec 1, 2021 plus \$35.00 surcharge) Post dated cheque sale day required for remaining balance.
- 12) Volume Discount available
- 13) New Hamco Cattle Co. Bull Insurance Program

CAA CED B.W. W.W. Y.W. Milk
 EPD +12.0 +0.8 +87 +146 +26

- * Raptor is clearly the best bull we have ever raised at Hamco. He has stood out for his performance, length of body, bone & overall width with excellent docility.
- * Exceptional EPDs-WW, YW-top 1%, CED-top 3%, BW-top 20%, Milk-top 15%
- * His first calf crop mainly out of heifers has been outstanding. His calving ease & tremendous performance after birth make him a very valuable breeding bull. He is easily competes with the best AI bulls available. Topp Angus have used him heavily in their program & they are very excited with his progeny so far.
- * We have never raised a bull that does everything so well.
- * This sale presents a great opportunity to get in on the ground floor to introduce his genetics into your herd.
- * We have export qualified semen available on this great bull (see page 58)

- * Raptor 34H is another very good, thick made, wide bodied Raptor son with good muscle shape, good hair & a nice Angus head.
- * Dam 171F is a well bred Effective daughter out of a Net Worth cow.
- * Very good performance on test. ADG 4.12-116
- * Elite EPDs CED, BW, WW, YW-top 10% or better.
- * Great calving ease with top end performance.
- * Recommended for heifers.

Selection of a herd bull is a very important decision for your farm as your herd bull contributes 50% of your calf's genetics!!!

EPD	+2.0	+3.6	+74	+119	+15

- * The featured \$750,000 high selling bull from the 2017 Schaff Angus Valley bull sale
- * Incredible in his structure and powerful in his design. He is one of the best Charlo sons out of the #1 income producing cow in SAV history (over 10 million dollars) - SAV Blackcap May 4136.
- * President sired the high selling SAV America 8018 bull at 1.51 million on Feb. 9, 2019
- * One of the most popular Angus Sires. Semen if available sells for about \$175.00

These ET President sons of Raptor's Dam Peggy 6055 are the best set of ET brothers we have ever produced. They are worth a trip to the farm to view them in real life. They are like peas in a pod-very similar. We are retaining the 8th brother to use in our purebred herd & it was difficult to decide which one to pick as they were so similar.

EPD	+1.0	+5.5	+53	+97	+22

* Atlanta 5013 was an exciting addition to our walking herd bull battery. We purchased him from the Janssen Voss Angus Sale in Iowa in 2016.

* Phenotypically Atlanta is very hard to fault. He is probably the widest, thickest bull we have ever walked & his progeny have been outstanding.

* SAV Harvester has done a great job wherever he has been used. Atlanta has developed into an impressive herd sire. A 3/4 brother Janssen Earnhardt sold to Peak Dot in the same sale & his progeny have been outstanding.

- * Dam Reba 322D has a daughter retained.
- * Recommended for cows.

Hamco was involved in a Canadian Angus Association study last summer. It was a study on 45 bulls (G bulls) on High Immune Response (HIR) and the ability to fight disease. Part of that study was genomic testing-Angus GS on all the study bulls. The Angus GS adds considerable accuracy to the EPDS of the bull and verifies parentage. So all the bulls that were genomic tested have Angus GS beside their name in the catalogue

- * Recommended for heifers.

HAMCO RAPTOR 3F

Semen Available
 \$40.00 per dose
 \$35.00 for 10 more doses
 Special prices for Commercial Producers

Raptor 3F is a bull that continues to impress us as he develops and his offspring mature. He is a very efficient breeder and has produced excellent frozen exportable semen. Raptor 3F excels from the standpoint of muscle mass, rib and structure. He stands on an ideal set of legs with good bone and near perfect feet with good depth of heel. He has a great disposition and certainly has that herd bull presence.

CAA	CED	B.W.	W.W.	Y.W.	Milk
EPD	+12.0	+0.8	+87	+146	+26

His EPD profile is impeccable—CED-top 3%, BW-top 20%, WW, YW, carcass weight-top 1%, milk-top 15%. His calving ease is a result of shorter gestation-averaged 275 days on 22 heifers AI breedings.. Once the calves hit the ground their growth is impressive. He has 10 good sons in this sale and his daughters look very good. Topp Angus has an American semen interest in Raptor and they have used his semen in their very strong program, including a number of ET offspring. Paul is very excited with the Raptor calves he has on his ranch.

Certainly some of his great genetics are from his very good Capitalist 028 dam-Topp Peggy 6055. Her 8 ET SAV President sons are also very impressive and 7 are in this sale.

When you evaluate his sons in this sale we think you will be impressed. Phenotypically very good and very good calving ease with outstanding performance. We are very excited to continue to use him in our herd and in other herds. He certainly also has a lot to offer to commercial herds as well.

Contact David if you are interested in semen off this great bull.

Thank you to our 2020 Hamco Buyers

Terms: The terms of sale are cash or cheque payable at par. Settlement to be made immediately after the completion of the sale. All settlements must be made with the clerk of the sale before any cattle will be released.

Disputes: In case of disputes, bidding will be re-opened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision of all disputes is final.

Announcements: All announcements made from the auction block will take precedence over the printed matter in the catalogue. Buyers should pay close attention to any such announcement.

Purchaser's Risk: Each animal becomes the risk of the purchaser as soon as sold.

Insurance: Insurance will be available on sale day.

Accidents: Although every precaution will be taken to protect the safety and comfort of buyers, neither the sale management nor the auctioneer assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of accident or loss property.

Liabilities: All persons attending the sale do so at their own risk and sellers assume no liability, legal or otherwise, for any accidents occurring in or about the premises.
